

## CAREER OPPORTUNITIES

## Junior Formulation Development

### Role

- Title: Junior Formulation Development Scientist, reporting to a team leader within the R&D Formulation Department.
- We are looking for an open-minded individual, that is attentive to detail and persistent, that will be able to provide outside-the-box solutions to complex problems.

### Duties and Responsibilities

- Product formulation and process development including background research on planned new Remedica products
- Carrying out of experiments in order to obtain stable formulations with a feasible manufacturing process
- Scale-up of R&D formulations into full-scale production
- Coordination and supervision of work at Contract Research Organizations for the development of Remedica's products
- Carrying out of technology transfer activities to and from Remedica

### Qualifications, Skills, Experience

- University degree in Pharmacy, Chemical Engineering or related science subject, preferably with MSc.
- Very good spoken and written English required.
- Ability to communicate in Greek is an advantage.
- Proficiency in Windows, Word, Excel.
- Prior knowledge of pharmaceutical research or manufacturing is an advantage but not an absolute requirement.
