## Junior Quality Assurance Scientist

### Role

The Junior Quality Assurance Scientist will be responsible to assess and evaluate Remedica's change controls in order to ensure compliance with GMP regulations concerning quality, safety and efficacy.

### Duties and Responsibilities

1. Initiating change requests impacting the GMP of the manufacturing facility
2. Evaluating and monitoring change requests
3. Preparing or assisting in the preparation of technical reports, documents and reports
4. Providing training to new employees on how to submit CRFs (Change Request Form) requests through the electronic system.
5. Communicating with relevant internal stakeholders in order to collect feedback needed for the potential implementation of changes to specific products
6. Ensuring that tasks and processes are executed according to established regulations and guidelines such as Standard Operating Procedures (SOPs), Good Documentation Practices (cGDP) and the current Good Manufacturing Practices (cGMP)

### Qualifications for the job:

- Degree in Pharmacy, Chemical Engineering or any other relevant field

### Experience:

- Any relevant experience will be considered an advantage

### Required Skills:

- High attention to detail
- Organized and methodical way of thinking
- Ability to work collaboratively in a team
- Excellent written and verbal communication skills
- Excellent command of the English Language
- Knowledge of Microsoft Office

An attractive remuneration package depending on qualifications that includes 13<sup>th</sup> and 14<sup>th</sup> salary, Provident Fund, medical cover, gym access, subsidized meals etc are offered. Interested candidates should apply online through Remedica's website [www.remédica.eu](http://www.remédica.eu)
