## Senior R&D Formulation Scientist

### Role

The role is responsible to conduct research and formulation trials for product development and re-development of new and existing generic drug products. Duties involve formulation and process, the establishment of successful BE studies and finished product stability, resolution of potential production problems, execution of formulation development projects outsourced to 3rd parties.

### Duties and Responsibilities

- Evaluation of the product technical suitability at Remedica, especially for the critical and complex molecule/product
- Conducting literature research on the originator drug product (RLD)/drug substance prior to the initiation of lab activities, including Product & API patents (if applicable)
- Technical aspects: Designing of the formula & process as per QbD, evaluate equipment feasibility, API physical characterisation, DEC study, feasibility/prototype trials/scale up trials including the optimization of process and process parameters, stability testing in accordance to the specifications
- Works closely with IP and reviews patents and proposes non-infringing strategies for active pharmaceutical ingredients, compositions and manufacturing processes.
- Planning, organising, follow-ups must be made to achieve target timelines among technical teams as per the guidance from the supervisor/Head
- Compiling/reviewing formal documentation required for product registration purposes

### Qualifications for the job

- Bachelor in Chemical Engineering, Chemistry and Pharmacy
- Master's degree in pharmaceutical sciences preferred

### Experience

- Minimum 5 – 7 years of previous Job experience in pharma sector

### Required Skills

- Attention to detail, accurate and precise in recording data and batch information
- Strong analytical skills and mindset
- Good leadership skills are of essence.
- Timely decision making to avoid delays
- Demonstrated ability to work in both independent and team environments
- Ability to work under pressure with minimum supervision. Multi-tasking as per departmental requirement with minimum supervision
- Excellent communication skills
- Good organization skills
- Fluency in English writing and speaking
- Good MS skills (Word, PowerPoint, Excel)
